WHY COMPACCT

- **Reduce overall finance costs** – it helps you innovate processes, collaborate with supply chain partners, and streamline operations to reduce costs and resource demands.
- **Achieve faster results** –You can streamline accounting, consolidation, process scheduling, workflow, and collaboration.
- **Improve financial and managerial reporting** – it gives you the flexibility to report performance by business unit, organization, or cost center.
- **Improve overall corporate performance** – it provides the foundation to quickly read, evaluate, and respond to changing business conditions with accurate, reconciled and timely financial data.
- **Improve process integration** – You can integrate risk and bank transactions with core accounting and financial reporting processes.
- **Improve corporate governance and transparency** – it provides broader support of accounting standards, federal regulations, and improved administration of internal controls.
- **Improve cash flow and liquidity** – it automates dispute, credit, and collections management – and offers electronic invoicing and payment capabilities that supplement traditional accounts receivable and accounts payable functions to accelerate and manage cash flow.

IMPLEMENTATION METHODOLOGY

- Analysis
- Design
- Development
- Deployment
- Training and Operation

Implementation is fast and easy, without the need for expensive hardware and high fees for licensing, implementation, upgrades and maintenance. This also helps avoid additional financial burden for SMEs sector. Once implemented, the result is maximum value with minimal investment and low risk. We offer a powerful ERP solution for manufacturers and a high value proposition for SMEs who would rather expand resources on building a successful business.

A proof of concept should be completed as part of the ERP selection process when the risk of project failure is comparatively high. There are numbers of advantages to the proof of concept for selecting **COMPACCT** ERP solution. The client including expectation synchronization with the vendor Improved ownership of the implementation process Identification of functional gaps or overselling better understanding of investment required. More accurate scoping provides a better understanding of the investment required to complete the implementation.

SaaS

COMPACCT can be implemented as SaaS licensing and delivery model in which software is licensed on a subscription basis and is centrally hosted. It is sometimes referred to as "on-demand software"

NO INSTALLATION

As everything is on the web with few login credentials user can start feeding the data into the software from any computer with the help of internet connectivity. It is not the case with Traditional or server based ERP system which needs to be installed on every user machine.

LIVE ON-TIME IMPLEMENTATION

Our "Live On Time" program guarantees the customers on-time implementation of integrated ERP system at affordable cost. The "Live On Time" is a simple demonstration of deliverable confidence of the system.
